- RS School «JavaScript/Front-end»
- EF SET English Certificate

PROFILE

Creative person with rich life and work experience. Lived for 6 years in China, then moved back to Ukraine. Accustomed to working with international clients, excellent knowledge of English and Chinese. Initially worked in logistics and wholesale purchases, then studied marketing for a long time while working in sales and customer support.

The start of war in Ukraine gave me some free time to reconsider my life prospects and study something I wanted for a long time: IT development. I have been doing it successfully for a year, with significant progress and a portfolio full of new projects. I can easily work alone or in a team, even organise the team's work myself (I was a team leader in the TS Academy project).
