PROFILE

A junior web developer with over 1 year of IT experience in **front-end and back-end** development. A creative problem solver and team-oriented specialist who transforms ideas into action using **modern technologies, clean code, and user-friendly design**.

Mainly focused on front-end engineering (JS, TS, React, Redux, Next), while also proficient in **MERN** (MongoDB, Express.js, React.js, Node.js) stack apps. Fluent in English and Chinese (have been living in China for 6 years), with a track record of effective **communication and negotiations with international clients** for over 8 years. Proficient in contract management, ensuring compliance and adherence to deadlines.

Areas of functional expertise:

- **Programming in JS, TS, React and Node.**
- **Creating beautiful UI, that captivates users.**
- **Managing projects from concept to completion.**
- **Teamwork and cross-functional communication.**
- **Meeting deadlines and working under pressure.**
- **Negotiations and delivering exceptional customer service.**
